Sun Gait Trainer

Height Adjustable Frame

Multi-adjustable Accessories

Light-weighted Sturdy Material

CE

MD

The Sun Gait Trainer is a mobility device crafted to provide support and assistance to youngsters who face challenges with their mobility.

One Frame, Multiple Possibilities

The Sun Gait Trainer offers sturdy support, adjustable height, and customizable features to meet the unique needs of each user across various developmental stages. With a range of accessory options, the Sun Gait Trainer offers flexible anterior and posterior configurations for different stages of gait training.

User Height

Posterior Use

Anterior Use

Accessories

Headrest

The headrest provides stable and gentle support to the user's head, allowing the user to maintain correct and comfortable position while walking.

Also, the headrest is crafted with antibacterial and breathable materials, providing a hygienic environment and preventing moisture buildup.

And the adjustable features ensure a customized fit for each user.

Left and Right

Up and Down

Front and Back

Backrest

The backrest provides support to the user's trunk during gait training, preventing backward falls. With three adjustable backrest angles (80°, 85°, and 90°), a gentle forward tilt helps move the user's center of gravity forward, supporting a smoother start to gait training.

Swivel Armrest with Handlegrip

The handledrip is fixed with the armrest, ensuring the handle rotates together with the armrest for better control and support during gait training.

Swivel Armrest with Adjustable Handlegrip

Swivel forearm support with a 360° rotating, angle-adjustable handlegrip for flexible positioning and improved comfort during use.

Upper Trunk Support Pad

The upper trunk support pads stabilize the user's upper body and provide sufficient support. When used together with the backrest and saddle seat, no additional straps are required for fixation.

Wrap-Around Trunk Support

The Wrap-Around Trunk Support stabilizes the user's trunk and provides reliable support. Its height and tilt angle are adjustable, and it can be used in both anterior and posterior modes of the Sun Gait Trainer.

U Style Harness

The U-Style Harness supports the user's upper body, helping to maintain an upright posture and improve control during walking and gait training. It is available in sizes S, M, and L to accommodate different needs.

Hip Positioner

The Hip Positioner provides crucial support for the pelvis and hip area, ensuring proper alignment and stability for the user. It is available in sizes S, M, and L for a customized fit.

Leg Separator

The Leg Separator prevents the feet and lower legs from crossing the midline, guiding the child towards a more neutral and natural walking pattern.

Ankle Prompts

Ankle Prompts are designed to prevent the crossing of legs or scissoring during walking. They attach to the bottom of the gait trainer frame and can be adjusted in length for customized foot separation.

Posterior Saddle Seat

Designed for posterior gait training, the adjustable and foldable saddle seat offers support while training and a convenient resting position for children when fatigued. Its height can be adjusted to suit different users, providing a flexible and comfortable option for breaks.

Anterior Support Seat

Designed for anterior gait training, the Anterior Support Seat helps support the user during transfers and setup. It allows caregivers to position the child securely before fitting upper body supports and other accessories. During training, it can also provide short-term resting support, but is not intended for full weight-bearing seating.

Multifunctional Castors

The Multifunctional Castors are designed with anti-slip materials to ensure safety and stability during use.

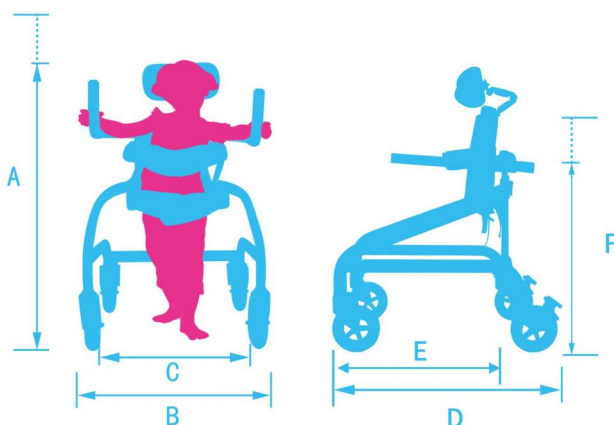

Front Castors

Equipped with swivel locks that can be set to allow forward rolling only, enhancing control and direction.

Rear Castors

Feature swivel locks for forward rolling, along with braking and speed control functionalities for added safety and customization.

Cocoon Car Seat

Wrap your child in the
comforting cocoon of
safety and convenience.

The Cocoon Car Seat is designed to provide utmost safety and comfort for children with special needs. From its swiveling base for parental ease to the adaptability for both forward and rearward facing modes, secure ISOFIX installation, and a range of accessories, the Cocoon Car Seat promises an unparalleled experience for children in all age.

Features

Adjustable Seating Modes

Embrace the flexibility of forward and rear-facing configurations, with adjustable seat height, making it suitable for children across all age groups. Grow with your child, ensuring a prolonged and adaptable usage.

Adjustable Seat Tilt Angle

When used in the rear-facing position, the seat's angle is customizable, offering your baby a cocoon-like space of safety and comfort.

ISOFIX Installation

The Cocoon Car Seat features ISOFIX compatibility, providing a secure and straightforward installation process compatible with most car models.

5-Point Harness System

Ensuring optimal safety, the Cocoon Car Seat features a versatile five-point harness system, designed to securely fasten the child in place. This adaptable system accommodates standard safety belts and additional positioning harnesses as needed, all easily adjustable to provide a snug fit without compromising comfort.

Personalized Customization

To address the distinct needs of different special-needs children, we offer a range of accessories that complement the Cocoon Car Seat, ensuring a tailored and comprehensive solution.

Accessories

All seat cushions and accessories are removable, and made by breathable, antibacterial materials, allowing for effortless cleaning.

Lateral Support Pads

The lateral support pads can help the child maintain stable and comfortable position.

Thigh Support Cushion

The thigh support cushion can prevent the child legs being abnormal position, like "scissoring".

Footplates

The footplates help fix the child's feet, providing extra stability and feeling of security.

Item Dimensions

Weight Capacity	0 - 36 kg

Cloud Booster Seat

The Cloud Booster Seat is meticulously crafted to redefine every car journey for children from 3 to 12 years old with unique requirements. The Cloud booster seat offers multiple seating modes which can meet the child's changing needs during growth. It can also integrate with different optional accessories, allowing for personalized customization that guarantees utmost safety and supports the user in maintaining an optimal and cozy posture throughout their road adventures

The Cloud booster seat embodies safety, portability, and easy assembly, offering both the user and caregiver a delightful and hassle-free car voyage.

Adjustable Headrest

Adjustable Side Wings

Convenient to Carry

Features

Adjustable Seating Modes

The headrest's height is able to be adjusted as the user grows. The height and width of the side wings are adjustable, providing a comfortable and stable seating experience for users of different body shapes.

Utmost Safety

The Cloud booster seat comes equipped with a five-point harness system that secures the child firmly in place while also accommodating safety belts and any additional positioning harness they may require. The harness is adjustable to ensure a snug fit without causing discomfort.

Personalized Customization

We offer a variety of optional accessories, such as side wings and leg rests, to meet the unique needs of different users, enhancing both their comfort and safety during travel.

Quick Installation

The Cloud booster seat features the ISOFIX connect system, which makes it fit into a wide range of vehicles, and enables easy and rapid installation and removal. Also, the Cloud is lightweight and foldable, allowing for storage in the trunk.

Accessories

All seat cushions and accessories are crafted from breathable, antibacterial materials, allowing for effortless removal and cleaning.

Calf Stabilizer

The calf stabilizer is designed for the user with calf muscle weakness, instability or require extra support while sitting. It can help keep the user's calves in a fixed position, effectively preventing crossing or "scissoring".

Fixed Side Wings

The side wings offer upper body support, ensuring proper posture and enhancing both comfort and safety during car journeys.

Swing-Away Side Wings

The Swing-Away Side Wings provide the same core support as the fixed side wings, with the added benefit of a swing-away function. Caregivers can simply press a button to open the side wings, making it easier to position the user securely in the car seat.

Item Dimensions

Item Dimensions	Size
